Bhiwani, Haryana, India | Open to Remote Worldwide | Immediate Joiner

EDUCATION

Sh. L.N. Hindu College, Rohtak Oct 2026 – Present
Bachelor of Computer Applications (BCA) – Rohtak, Haryana

EXPERIENCE

Generative AI Engineer – MemoryOS (Self-Founded) Jan 2026 – Present
Building a universal AI memory layer for LLM platforms – Remote

- Accomplished the creation of a universal AI memory layer from scratch for ChatGPT & Claude, measured by persisting context across sessions, by architecting a Next.js 15 + NestJS full-stack system with Gemini API memory extraction and a Plasmio Chrome extension.
- Accomplished sub-200ms semantic memory retrieval, measured by query performance benchmarks, by implementing HNSW vector indexing with gemini-embedding-2 (768 dims) on PostgreSQL + pgvector, backed by Redis + BullMQ.

Python Development Intern – Cognifyz IT Solutions Pvt. Ltd. Jul 2026 – Aug 2026
Backend development tasks and data tooling – Remote

- Accomplished the delivery of 8 Python modules on schedule, measured by timely completion targets, including a BeautifulSoup web scraper and a Matplotlib/Plotly data visualization tool, with clean and documented code.

Generative AI Engineer – Freelance (Independent) Jan 2022 – Present
AI systems and automation for clients worldwide – Remote

- Accomplished the elimination of repetitive manual support work for 3+ clients, measured by reduced support tickets, by building a RAG document Q&A system (LangChain + ChromaDB) that let non-technical teams query knowledge bases in plain English.
- Accomplished the generation of 88+ qualified leads per campaign across 6 verticals, measured by outreach conversion rates, by designing an AI cold email pipeline (Apollo.io + Instantly.ai + OpenAI) utilizing AI-assisted coding and automated prompt workflows.
- Accomplished support automation for 10+ client businesses, measured by response time reduction, by deploying full-stack LLM chatbots (OpenAI, Anthropic Claude, Ollama) for lead qualification and FAQ handling.
- Accomplished the deployment of 5+ production Telegram bots for international clients, measured by successful integration milestones, featuring trading alerts and lead capture integrated into event-driven Python backends.
- Accomplished the prototyping of client tools at zero API cost, measured by infrastructure cost savings, by running a fully self-hosted AI coding agent on a Ubuntu VPS utilizing Qwen2.5-Coder 14B via Ollama, smolagents, and ChromaDB.

PROJECTS

MemoryOS | Next.js, NestJS, pgvector, Redis, Gemini API Jan 2026 – Present

- Accomplished seamless cross-platform session context management, measured by automated memory extraction, by developing a full-stack Next.js and NestJS system integrated with the Gemini API.
- Repo: github.com/GauravFrr/MemoryOs

Nyxleads | Python, Typer, FastAPI, Supabase, Nuitka 2026 – Present

- Accomplished the creation of a commercial AI lead scraping CLI from scratch, measured by secure license-key auth and hardware fingerprint binding, utilizing a Python and FastAPI backend paired with Supabase.
- Repo: github.com/GauravFrr/Nyxleads

Retryv | FastAPI, Gemini API, ChromaDB, BM25, Streamlit 2026

- Accomplished the deployment of a production-grade RAG system, measured by retrieval accuracy, utilizing hybrid BM25 + vector retrieval with Reciprocal Rank Fusion (RRF) and a confidence-gated response guard built with FastAPI.
- Repo: github.com/GauravFrr/Retryv

Local Offline AI Coding Agent | Qwen2.5-Coder 14B, Ollama, smolagents, ChromaDB, Gradio 2025

- Accomplished zero API costs and full offline functionality, measured by complete operational independence, by self-hosting an AI coding assistant on an Ubuntu VPS with vector memory and streaming chat capabilities.

ADDITIONAL PROJECTS

- Vyom** (Python, Claude API, Imagen 3, Veo 3.1) – AI Hindi YouTube Shorts studio – Claude-generated scripts, AI-generated video and visuals.

- **Rythmiq** (Kotlin, Jetpack Compose, ExoPlayer, Supabase) – Spotify-style Android music app for Hindi, Punjabi & English music via JioSaavn API.
- **Atlas Agent** (Python, LangChain, Gemini 2.5, Groq) – Autonomous AI agent orchestrating multiple tools across 40+ automated earning workflows.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Kotlin, Bash

Frameworks: React, Next.js, Node.js, NestJS, FastAPI

Databases: PostgreSQL, pgvector, Redis, ChromaDB, Supabase, Firebase

Dev Tools: Cursor, Git, GitHub, Docker, Railway.app, Linux VPS, n8n

AI/LLM/Concepts: AI Agents, LangChain, LangGraph, RAG, Prompt Engineering, OpenAI API, Anthropic API, Gemini API, Ollama, smolagents

CERTIFICATIONS

- Anthropic Academy – Claude 101
- Anthropic Academy – Claude Code 101
