Bhiwani, Haryana, India | Open to Remote Worldwide | Immediate Joiner

EDUCATION

Sh. L.N. Hindu College, Rohtak Oct 2026 – Present
Bachelor of Computer Applications (BCA) Rohtak, Haryana

EXPERIENCE

Generative AI Engineer — MemoryOS (Self-Founded) Jan 2026 – Present
Building a universal AI memory layer for LLM platforms Remote

- Built a universal AI memory layer for ChatGPT & Claude that persists context across sessions, by architecting a Next.js 15 + NestJS system with Gemini API memory extraction and a Plasmio Chrome extension.
- Enabled sub-200ms semantic memory retrieval by implementing HNSW vector indexing with gemini-embedding-2 (768 dims) on PostgreSQL + pgvector, backed by Redis + BullMQ.

Python Development Intern — Cognifyz IT Solutions Pvt. Ltd. Jul 2026 – Aug 2026
Backend development tasks and data tooling Remote

- Delivered 8 Python modules on schedule, including a BeautifulSoup web scraper and a Matplotlib/Plotly data visualization tool, with clean and documented code.

Generative AI Engineer — Freelance (Independent) Jan 2022 – Present
AI systems and automation for clients worldwide Remote

- Eliminated repetitive manual support work for 3+ clients by building a RAG document Q&A system (LangChain + ChromaDB) that let non-technical teams query knowledge bases in plain English.
- Generated 88+ qualified leads per campaign across 6 verticals by designing an AI cold email pipeline (Apollo.io + Instantly.ai + OpenAI) that auto-wrote personalized icebreakers at scale.
- Automated support for 10+ client businesses by deploying LLM chatbots (OpenAI, Anthropic Claude, Ollama) for lead qualification and FAQ handling — replacing manual first-response teams.
- Shipped 5+ production Telegram bots for international clients — trading alerts, lead capture — integrating payment gateways and real-time APIs into event-driven Python backends.
- Ran a fully self-hosted AI coding agent on a Ubuntu VPS (Qwen2.5-Coder 14B via Ollama, smolagents, ChromaDB) to prototype client tools at zero API cost.

PROJECTS

MemoryOS | Next.js, NestJS, pgvector, Redis, Gemini API Jan 2026 – Present
• Universal AI memory layer for ChatGPT, Claude & Gemini — captures conversations, extracts structured memories, and injects context into new sessions automatically.
• Repo: github.com/GauravFrr/MemoryOs

Nyxleads | Python, Typer, FastAPI, Supabase, Nuitka 2026 – Present
• Commercial AI lead scraping CLI with license-key auth, hardware fingerprint binding, and 3 subscription tiers with anti-piracy thin-client architecture.
• Repo: github.com/GauravFrr/Nyxleads

Retryv | FastAPI, Gemini API, ChromaDB, BM25, Streamlit 2026
• Production-grade RAG system over FastAPI's official documentation using hybrid BM25 + vector retrieval with Reciprocal Rank Fusion (RRF) and a confidence-gated response guard.
• Repo: github.com/GauravFrr/Retryv

Local Offline AI Coding Agent | Qwen2.5-Coder 14B, Ollama, smolagents, ChromaDB, Gradio 2025
• Fully self-hosted AI coding assistant on Ubuntu VPS with vector memory and streaming chat — zero API costs, running entirely offline.

Additional Projects:

- **Vyom** (Python, Claude API, Imagen 3, Veo 3.1)
AI Hindi YouTube Shorts studio — Claude-generated scripts, AI-generated video and visuals.
- **Rythmiq** (Kotlin, Jetpack Compose, ExoPlayer, Supabase)
Spotify-style Android music app for Hindi, Punjabi & English music via JioSaavn API.
- **Atlas Agent** (Python, LangChain, Gemini 2.5, Groq)
Autonomous AI agent orchestrating multiple tools across 40+ automated earning workflows.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Kotlin, Bash

AI/LLM: LangChain, LangGraph, RAG, AI Agents, Prompt Engineering, OpenAI API, Anthropic API, Gemini API, Ollama, smolagents

Frameworks: FastAPI, Next.js, NestJS, React, Node.js

Databases: PostgreSQL, pgvector, ChromaDB, Redis, Supabase, Firebase

Dev Tools: Docker, Git, GitHub, Railway.app, Linux VPS, n8n, Cursor
